CLINTIC ASKS LANDS FOR OKLAHOMA COLLEGES

World's Washington Bureau.

WASHINGTON, D. C. May 19.— Congressman James V. McClintic of Okiahoma today introduced a bill granting the state of Oklahoma 210. stanting the state of Oklahoma 210, eee acres of unappropriated non-mineral land for the benefit of its splicelitural and mechanical colleges, according to the provisions of the act of July 2, 1852, which provided for the apportionment to each state of 10.000 acres of non-mineral land is the value of \$1125 per acre for tunn schaffer and representative.

In case there is not this amount of land in tikinhoma, McClintic's bill would have the treasury department would have the treasury department pay the state of Oklahoma at the rate of \$1.25 an acre for the de-

"So far as I can judge—and I have had conversations with many senators, including members senators, including members of both parties—I am satisfied that a majority of the senate feel very strongly that the league as now presented must receive amend-ment, that in its present form, without any change, it would not be accepted.

"To say that the amendments put forward in the senate and proposed and formulated by Mr. Root on the suggestion of the state department have been met is without foundation. Not one of the suggestions of the senate, not one of the amendments proposed by Mr. Root has been carried out. Some have been entirely rejected, and where there is an appearance of their beauty have been dealed of of their having been adopted, ex-amination shows that the new form is distinctly worse than the

old, and more dangerous to the peace of the world and to Ameri-can rights and interests. "It-is impossible now to enter upon a detailed analysis because, although we may suppose that the draft of the league sent over in the press dispatches is fairly accurate, we have no knowledge of the treaty with Germany or of its rela-tions to the league. The sum-mary which was sent was not only incomplete, but vague and inac-curate and it is impossible to gather from it what the terms im-

posed upon Germany in many respects really are.
There is no desire anywhere "There is no desire anywhere to delay the treaty of peace with Germany one moment beyond the time necessary to understand it, but we must have it before us in the official form. As to the league of nations, the American people must know just what they are to be asked to agree to. By that league they are invited to take the gravest step ever taken by the the gravest step ever taken by the United States and no organized clamor, no manufactured pressure of any kind will swerve the senate from its high duty of laying hefore the American people ex-actly what the league involves and what it means to the United States and to the future peace of the

MONEY CAN'T DO EVERYTHING. MONEY CAN'T DO EVERYTHING.

He is a banker proud and rich, when poor men come beaseching dough the listens to their dismal tales then very promptly answers 'no. Great amms of gold are his to rule, great amms of gold are his to spend.

And if you pledge your very life sometimes great sums to you be'll lend. But though he wields so great a power and owns so much for which I hanker.

I rannot write a goodly check, I can not walk into his place.

And pry the shekels from his grasp with pleasant word or smaling face. I do not meet on Tuesday noons to settle questions of finance.

To hear a borrower's plea for gold and wonder if to take a chance.

Im just a noor hard-working man, a drifter with no place to anchor.

But when it comes to playing golf, Ive got the edge upon the banker.

I write this in my book of joy, whene er we golf, I trim the banker.

Down in his marble office fine I'm forced to do the way he thinks. But the time with the follows me upon the links. "Tis I who hold the bonor then, his gold cannot do everything. With all his wealth he cannot buy an easy and a rhythmic awing. To I've this satisfaction awast to soothe the sting of other rancors. The worst of dubs on every course are very apt to be the bankers. He began his career as a merhanic and arose to the rank of a flier under the tutelage of Bopwith, one of the earliest British airmen. He first came into pre-eminence October 24, 1912, when flying a Bopwith biplane designed after the pattern of the Wrights, he established the then British record of 8 hours and 23 minutes for a duration flight and won the British Michelin Trophy for that year.

In 1913, flying a Bopwith equipped with a Gnome motor, he established the then British altitude record of 12,900 feet and on the same day carried aloft two passengers to a height partment tonight that the American scaplane NC-4, in command of Lieutenant Comm Read, would leave Horts, Fayal, tomorrow at 7 o'clock, Greenwich time (3 a. m. The early hour set for the start of the flight to Ponta del Gada was interpreted by naval officials here to mean that Commander Head would attempt tomorrow to make the entire trip of more than 22 nautical miles to Lisbon, Fortugal, the real end of the transationtic flight. The stop as Pouta del Gada was thought to be planned for the purpose of obtaining supplies.

12,900 feet and on the same day carried aloft two passengers to a height of 10,500 feet. Later he attained what was claimed to be the world's utitude record—28,500 feet—which, of course, was later excelled. During the war Hawker was engaged as an experimental filer assisting in the development of Sopwith machines. Commander Grieve is 28 years old. He is a wireless expert and a meteoriogist as well as a flyer and for a time during the war commanded the cruiser Campania, mother ship of the British air squadron with the Grand fleet. WASHINGTON, May 19.—After weathering a 60-mile gate and heavy seas the miseing seaplane NC-3, flagship of the American navatrans-Atlantic flight squadron, entered Ponta del Gada harbor loday under her own power, nearly 60 hours from the time she was forced down by a fog when almost in sight of the Asores on the record-breaking flight from Newfoundland for Lisbon and Plymouth, England.

Searching battleships and destroyers were scouring the seas and naval officials had all but abandoned hope for the safety of the flying ship and her crew of five, when warships at Ponta del Gada saw the plane crossing the water, headed for the flight
